

RG-200

Veterinary Aspiration and Suction System

Product Description

- The RG-200 is a compact and portable aspiration and suction pump specifically designed for veterinary use. It provides both water and air irrigation as well as suction functions to support surgical and endoscopic procedures. The unit features dual modes for large and small animals, adjustable fluid flow, and quiet operation ($\leq 70\text{dB}$).

Compatible with Endoscopy

- **Efficient Flushing:** Delivers water or air to irrigate the surgical area, improving visibility and hygiene during endoscopic procedures.
- **Powerful Suction:** Removes blood, fluids, and surgical debris to maintain a clear operative field.
- **Compatible with Scopes:** Works seamlessly with both rigid and flexible endoscopes, enhancing its utility across various procedures.
- **Versatile Applications:** Ideal for laparoscopic, arthroscopic, and diagnostic interventions, supporting a wide range of veterinary surgical needs.
- **Enhanced Visualization:** Assists the surgical team in maintaining an unobstructed view, contributing to surgical precision and safety.

Technical Parameters

Flow rate			
Flushing flow rate	≥15ml/s	Suction flow rate	≥30ml/s
Power			
Rated voltage and frequency	100-240 V ~,50Hz / 60 Hz	Input power	16VA
Size			
Length*Width*Height	245*242*98	Weight	3KG

Accessory List

	Picture	Part No	Item	Auantity
Standard		RG-200	Water/air irrigation & suction pump	1
			Footswitch	1
			Clean water bottle	1
			Wastewater bottle	1
			Water and air supply tube	1
Optional		A133	Handpiece for irrigation & suction reusable(autoclave)	1
		APT300	Silicone tube diameter 4mm	1
		APT300	Silicone tube diameter 9mm	1
		AMT5	Metal tube for handpiece(5mm)	1
